

xFold™ Cinema

Heavy camera and sensor payload platform.

The xFold™ Cinema is designed to carry large camera and sensor payloads. Configurable as Quad, Hexa, x8 or x12 for industrial, commercial, cinematography, law enforcement, and military applications. With 15 lb payload capacity and up to 40 minutes endurance, the Cinema supports full-size cinema cameras, heavy-lift gimbals, and professional broadcast equipment for aerial filming and industrial surveying. Its vibration-damped mounting system and precision flight controls deliver smooth, stabilized footage even in challenging wind conditions, making it the platform of choice for high-end production and critical infrastructure inspection. The Cinema has been deployed on major film productions, broadcast events, and industrial survey projects worldwide, demonstrating the reliability and image quality demanded by professional operators.

TECHNICAL SPECIFICATIONS

MAX GROSS TAKEOFF	60 lb
PAYLOAD CAPACITY	15 lb
MAX SPEED	40 mph
MAX ENDURANCE	40 min
MAX CEILING	10,000 ft
MAX RANGE	20 km
CONFIGURATIONS	Quad, Hexa, x8, x12
APPLICATIONS	Industrial, commercial, cinematography, law enforcement, military
